

ABOUT US

- We are practicing Secondary school teachers working with TY students on a daily basis.
 - We have developed TY focused online courses which complement the existing Junior & Leaving Certificate curricula, but stay true to the experiential nature of the TY programme.
 - Our courses focus on motivating students and developing their knowledge and skills having regard to their specific experiences.
 - We provide access to an online learning platform which is structured by topic and time to guide students through their learning experience. Progress through each module can be easily seen by both student & teacher.
 - The courses are designed to encourage independent learning and the development of key skills.
 - Complete set of resources with worked solutions to support both students and teachers.
